## **DPW Construction Projects: 2012 Water Line Rehabilitation**

**Updated August 21, 2012**

As part of the Town's ongoing Capital Improvement Program, the Department of Public Works is coordinating the rehabilitation of various water lines throughout Town. The Town's Water Contractor, Defelice, Inc. began work in mid-May to replace the water main and service connections for Brantwood Road and Kensington Road.

Work for this project has been substantially completed at this time, including the installation of the water main, all sampling and water testing as well as removal of temporary by-pass piping. Individual water service connections have also been completed and only minor miscellaneous punch list items remain.

Until the project is officially completed, residents are asked to continue to comply with posted on-street parking restrictions to allow for the final stages to be completed. Further notices will be provided to abutters as necessary. Water rehabilitation updates will be posted online at [arlingtonma.gov/dpwprojects](http://arlingtonma.gov/dpwprojects).

The Department of Public Works would like to thank residents for their cooperation during these improvement projects.
